

# Assembly Instructions

**Tools needed:** scissors

## Step 1: Attach VELCRO® tape to frame (black hook tape goes on black frame)

Separate poles into two piles. One for horizontal and one for vertical. Vertical poles are longest.

Lay horizontal poles on a flat surface with “channel” facing up (the drilled holes in poles will be on the underside).

Match up the long pieces of black hook tape with the long poles and short pieces of tape with the short poles.

Begin with any horizontal pole and place black tape in the channel starting 1/8" in from the edge. Peel off the backing a little at a time so the sticky tape doesn't tangle. Before laying the end of the tape down, trim it to fit 1/8" in from the end of the channel. Press tape firmly into channel.

Repeat this process for remaining horizontal poles.

**NOTE:** black hook tape goes on frame, white loop tape goes on backdrop panels

## Step 2: Attach VELCRO® tape to panels (white loop tape goes on backdrop panels)

a. Remove panels from tube and lay on flat surface. Cut out notches in all four corners of each panel (see scissor symbols). Tape is to be attached to both top and bottom edges.

b. Start the white loop tape 1/8" in from side edge in the unprinted area where marked. Peel off the backing a little at a time so the sticky tape doesn't tangle. Trim the end of the tape 1/8" in from the edge. Press tape firmly onto panels to secure adhesive.

## Step 3: Assemble Frame

Lay all frame pieces on the floor as shown in frame diagram below.

Snap the hinges and corners into the vertical curved poles first and then connect the horizontal poles on the top and bottom.

Screw feet into bottom of frame (feet are optional).

NOTE: Top horizontal poles will have the holes on top, facing the ceiling. Bottom horizontal poles will have the holes facing the floor.

**Recommended: wait 24 hours to allow adhesive to bond to the frame and panels before final assembly.**

Line up panels so that panel #1 is on the far left

#### Step 4: Attach panels to frame

With frame standing upright in zigzag position, slide the bottom of panel #1 under the frame section in the order it belongs (see above for image). Wrap the bottom of the panel around the horizontal pole and position the white loop tape onto the black hook tape and press down securely.

Pull the panel up and wrap the top of the panel around the top horizontal pole of the frame, pressing the loop and hook tape together. Repeat for each panel.

#### Step 5: Enjoy your Walk-in Storybook!

#### PARTS LIST

Count all parts and make sure nothing is missing. Call 1-800-782-8697 **within 10 days** to report any missing part and we will replace it at no additional charge.

##### Panel parts

5 panels printed on both sides (see above)

White loop tape

##### Frame parts

8 hinges  
4 corners  
6 feet  
10 long poles  
6 medium poles  
4 short poles  
Black hook tape

#### To Download App

To download the free app, go to your tablet's app store and type "K.I.W.i. Storybooks" into search box (type exactly as shown, including periods). Select the app that matches your Storybook theme and download. App requires barcode labels to access content.

##### Barcode labels to use with app:

Open PDF barcode labels from your "Downloads" zip folder and print. Cut along trim lines so that you have individual labels. You may wish to laminate before trimming in order to create sturdier labels that can be used over and over again.

Attach the barcode labels to the backdrop with removable sticky tape, or removable Glue Dots® for easy attachment and removal from the Storybook panels.

Scan one label at a time with tablet to initiate app content.

If you need access to the barcode labels again in the future, please follow these instructions:

1. In your browser, go to: <https://shop.kiwistorybooks.com>
2. Click on the red "My Account" link on the top right of your screen.
3. Log in with your email address and password (created when you placed your order).
4. Under "My Orders," click "Review Orders/Track Packages."

5. You'll see a list of the order(s) you've placed. Click the "Download Files" link.

6. Click link at top of page: "Click Here to Download the Files You've Purchased."

7. On "Your Downloads" page, click the file name to download the .zip compressed file to your computer. Download one at a time if you've purchased multiple themes. Once downloaded, open the .zip folder and print the desired PDFs.
